

38th Congress of the J.E.C. 09 – 15-10-2022
Ruffrè – Alta Val di Non – ITALY

Ortsgruppe Bolzano

Organization:
***Associazione Micologica
Bresadola
Ortsgruppe Bozen
Ortsgruppe Sulzberg***

Welcome to Nonstal (Nonsberg)

The local groups of Bozen and Sulzberg of the Mycological Association Bresadola look forward to welcoming you to the 38th European Cortinarius Conference, which will take place from October 9th to October 15th, 2022 in Nonstal.

The Nonstal is the widest valley in Trentino and is located in the western part of the country. The valley is known throughout Italy for its apple production by the Melinda cooperative and for the numerous small inhabited towns surrounded by characteristic orchards and woods.

Its territory covers 596.74 km² and extends from 300 m above sea level of the Rocchetta area to 2'800 m above sea level of the northern peaks of the Brenta Group.

In the Nonstal there are two different types of idioms: German is spoken in three communities. These belong geographically to the Trentino Valley, but administratively to the autonomous province of Bolzano, South Tyrol. In the rest of the Nonstal Nones is spoken, a semi-ladinic dialect.

Locations at the congress

The regulations and restrictions currently in place in our country due to the Covid-Sars-19 pandemic have forced us to find a larger room than that in our host hotel, so the location for the conference was the "Sala dei Cacciatori Villa Imperiale" will be at the Mendel Pass. Our host will be the Hotel Waldheim with its pleasant and comfortable rooms and its renowned cuisine. In case of a large participation, the Hotel Paradiso, which is only a few kilometers away, will also be available for us.

How to get to Ruffrè – Hotel Waldheim

With private car

from the north

Leave the A22 Brenner motorway at the Bozen Süd exit and turn onto the MEBO SS38 expressway in the direction of Meran. At the first exit Eppan, continue right on the SS 42 Mendel Pass. After approx. 25 km you reach the Mendola Pass at an altitude of 1363 m. From there you go straight ahead, do not turn at the first crossroads in the direction of Ruffrè. After another 5 km you will find the Hotel Waldheim on the left-hand side, in the immediate vicinity of the second crossroads from which you can turn towards Ruffrè.

from the south

Those coming from Verona on the A22 motorway should take the Trento Nord or San Michele exit. In both cases, follow the signs for Val di Non SS43. Continue for 22 km to the village of Dermulo and turn right towards Alta Val di Non SS43 dir. Continue towards Passo Mendola/Bolzano and after 18 km you will find Hotel Waldheim on the right.

By plane

The nearest international airport is Valerio Catullo in Verona.

At the airport there are regular connections (shuttle bus, taxi) to the Verona Porta Nova train station, where there are numerous train connections in the direction of Trento/Brennero (see train).

By train

From Verona, regional and express trains run to Trento. In Trento you change to a train towards Val di Non. The closest train station to the conference venue is Dermulo. From here you can continue the journey by bus or arrange the onward journey to the hotel with the conference organizers.

In Munich there are express trains that reach Bolzano train station. From here you can continue your journey with the bus line 132 Bozen-Kalern. Get off at the St. Nikolaus stop and use the Mendel Pass cable car, line n. 134. As soon as you arrive at the Mendel Pass, you will be picked up by car by arrangement with the conference organizers.

All travel times can be found on the following website: <https://www.sii.bz.it/it/siipdfOldtimetables>

The other available hotel: Hotel Paradiso

Climate and vegetation

The Val di Non is a large plateau facing south, ranging from a few hundred meters above sea level to mountains over 2000 m high. The creeks and river go unnoticed because they flow in deep gorges. This geographical feature causes quite variable climate conditions.

The lower lying areas can be mild and thermophilic. In the middle of the valley we meet continental zones, and on the gradual ascent we come across subalpine, alpine and arctic-alpine climates. Therefore, there is a variety of plant communities, ranging from small oak forests, oak-pine forests, beech forests, spruce-fir-beech forests, mountain spruce forests, subalpine spruce forests, larch forests and pine forests. There are also riparian wetlands and peat bogs. As a result of climate change, the Non Valley has also suffered from periodic drought in recent years, and the typical autumn rains are often irregular. Therefore, the excursion program will only be presented during the conference.

Geology

Geologically, the Val di Non amphitheater corresponds to a tectonic depression. Various rock formations come into contact along the fault line. This means that the valley is corrugated, marked by a transition zone between the Bozen porphyry platform and the Adamello-Brenta groups, then affected by glacial erosion. The dolomitic limestone predominates, with large areas of marl deeply cut by the river Noce and its tributaries.

Collection areas

The collection areas are located throughout the Val di Non. Excursions will also take place in peripheral areas, such as in the forests that we visited on the occasion of the 2000 Cortinarius Conference in Caldaro. The detailed program will be presented at the opening of the conference.

Preliminary program

Sunday, 09th October 2022

12:00 – 18:00	Arrival, registration and accommodation of participants
18:00	Opening ceremony and welcome with aperitif in the Jägersaal of the Villa Imperiale on the Mendola Pass
